

Thanks very much for buying a Lateral Sound **FuzzFix**. We hope you enjoy it as much as we enjoyed designing and building your pedal.

FuzzFix is powered by a 9v battery. The vintage Germanium transistors it uses aren't compatible with modern power adapters. The good news is that it isn't very hungry, so the battery will last a long time provided you **unplug the input when not using the pedal**.

FuzzFix differs from most fuzz pedals in not having a 'fuzz' control - your guitar volume knob serves this purpose.

Check out our social media pages for demos and guides. Any questions? Send us a message, or email info@lateralsound.com
